## Welcome to 270net Technologies

**270net** is a veteran-owned small business located in Frederick, Maryland. Since our beginnings in 2001, we have specialized in website design and development and internet technology. We have over 200 commercial clients and are proud to consider each one a reference. Strategically located at the top of the I-270 Corridor, 270net provides technology solutions for a broad range of clients ranging from very small businesses to large government agencies.

Commercial services include website design, web application development, IT support, email and web hosting, search engine optimization and social media marketing.

Follow us on [Facebook](#) and [Twitter](#) - our community can vote on designs and win give-aways or coupons from our clients.

#### Another Successful Conference

*July 2010*

The Airborne Law Enforcement Association (ALEA) tasked Steve Flook to provide exhibitor and attendee registration systems support for their international conference that was held in Tucson Arizona this year. ALEA deemed the mega event a success, both organizationally and from a IT systems standpoint. Their custom exhibitor management and attendee management systems are completely web based, and integrate with their core association management system (AMS), which was also built by 270net. The tight integration means weary staff members no longer have to come back home with piles of paper and work to do post-event!

*The 270net Team*

#### Site of the Month: ECA

Electronic Contract Assemblers (ECA) - recently chose 270net's search engine optimization services to improve their site placement on Google and Yahoo. ECA's website was previously redesigned by our website design team. Not sure what electronic contract assemblers do? Check out their [list of electronic manufacturing services here](#).
